

Test burner PB2

12.02

DUNGS®
Combustion Controls

Technical description

The Dungs test burner PB2 with push button cock is flashback-proof.

Press the push-button 1 to release gas supply. The gas flow takes the required air in through the hole in the burner tube 3.

The gas-air mixture is fed to the burner head 4 and manually ignited at the outlet opening.

The gas supply remains open when the push-button is pressed and is immediately interrupted after the pushbutton is released.

Application

The universal gas test burner is used in firing systems for steam boilers and for venting gas regulator trains.

Test burners are required in compliance with the requirements of TRD 412 (5.95).

The PB2 is suitable for gases of families 1, 2 and 3.

Approvals

DVGW registration notice

DG-4514CO0300

Specifications

Connection	Standard R ½ Option Rp ½	
Max. operating pressure	Test burner:	500 mbar (50 kPa)
	Push-button valve:	5 bar (500 kPa)
Min. pressure	Functionally reliable from a minimum pressure of 0.5 mbar (50 Pa)	
Ambient temperature	-15 °C to +70 °C	
Installation position	Vertically upright	

Order details	Type	Order No.
Test burner (complete with nozzle)	PB2 for natural gas; R ½	087 478
	PB2 for LPG; R ½	196 640
	PB2 for town gas; R ½ not approved for Austria	178 970
Nozzles (spare / replacement)	Natural gas Nozzle, 1.8 dia.	033 217
	LPG Nozzle 2b, 0.8 dia.	084 947
	Town gas Nozzle 2a, 1.3 dia.	087 353
Sealing ring		227 125
